A New Year’s Resolution
You Can Keep!

Check for and eliminate electrical hazards in your home:

- Replace missing or broken wall plates.
- Check for loose-fitting plugs.
- Check for outlets overloaded with multiple adapters & plugs.
- Have an electrician check outlets or switch plates that are discolored or warm to the touch.
- Replace electrical cords that have frays or broken casing.
- Make sure light bulb wattage matches the fixture requirements.
- Make sure outlets have Ground Fault Circuit Interrupters (GFCIs) in the kitchen, bathroom, laundry and outside.
